ACKNOWLEDGEMENT

This project will not be successful without the kind support of the advisor, committees, and all supportive persons. We would like to thank everyone for their advice and help. We are also grateful to our parents and friends for their continuous encouragement throughout this project. This accomplishment would not have been possible without them. Thank you.

Abstract

This project is a part of the Computer Engineering Pre-Project course. “LPG WEB SERVICE” the project organizers have a desire to bring the knowledge that has been learning and developing to be useful in practice to the intended purpose and develop ecommerce by creating website.

There is SQL to help manage the database. Used to store data. Used Visual Studio Code to develop web application. That can import and expert product information. Develop function that can view order history.

Keyword: website, LPG, Ecommerce

CHAPTER 1

INTRODUCTION

1.1 Background and Rational

Nowadays, ecommerce or selling goods or services on the internet have been known increasingly in daily life. for example, Shopee, Amazon, Lazada etc. especially Covid-19 situation had more dangerous ecommerce is an importance solution to solve this situation, so our group came with an idea about to make an ecommerce website to sell LPG gas for house and restaurant which applies knowledge we have been learning until now.

In this project we want to create an ecommerce website about LPG WEB SERVICE for making LPG business more accessible to people which contain login system, ordering system, payment, administrative page.

1.2 Objective

1.2.1 To develop an ecommerce website for making LPG gas business easier to accessible to people.

1.2.2 To study and learn and develop a web application system.

1.3 Scope

We have 2 types of users they are admin and user(customer).

1.3.1 Admin

- 1) Log-in and Log-out by specific username and password.
- 2) Import product file including image file.
- 3) View product and users' information.
- 4) Able to create, add, edit, delete product information, user's information of system.
- 5) Able to view history of ordering product.

1.3.2 User (customer)

- 1) Registration
- 2) log-in and log-out by their own username and password
- 3) Able to order products.
- 4) view history of ordering product.

1.4 Methodology

- 1.4.1 Proposal preparation and defense.
- 1.4.2 Literature review and requirement gathering.
- 1.4.3 Design website and system design.
- 1.4.4 Front-end development and database implementation.
- 1.4.5 Testing website.
- 1.4.6 Develop website.
- 1.4.7 Senior project 1 document preparation.
- 1.4.8 Senior project 1 exam
- 1.4.9 Senior project 2 document preparation
- 1.4.10 Senior project 1 document exam

Plan
Table 1.1 Working plan.

	Pre-project					Project		
Plan/Month	Jan	Feb	Mar	Apr	May	Jun	July	Aug
Proposal preparation and defense								
Literature review and requirement gathering								
Design website and system design								
Front-end development and database implementation								
Testing website								
Senior Project 1 presentation								
Senior Project 2 presentation								

1.5 Expected Result

1.5.1 Has developed more code writing skills.

1.5.2 Get a prototype ecommerce website about LPG selling and service.

1.6 Place and Equipment

1.6.1 MFU university

1.6.2 Software

1) Visual Studio Code

2) Xampp

CHAPTER 2

LITERATURE REVIEW

2.1 Related Theory

Online shopping is a form of electronic commerce which allows consumers to directly buy goods or services from a seller over the Internet using a web browser or a mobile app. Consumers find a product of interest by visiting the website of the retailer directly or by searching among alternative vendors using a shopping search engine, which displays the same product's availability and pricing at different e-retailers. As of 2020, customers can shop online using a range of different computers and devices, including desktop computers, laptops, tablet computers and smartphones.

2.2 Related Research

2.3 Related Work

Shopee is similar to our website.

Feature	Shopee	LPG web service
Coding language	Go	Html, CSS, JavaScript
User	There are 2 users. They are admin, officer, and user.	There are 2 users. They are Amin and user.
Service area	Global, country	Specific area, local area

2.2 Related Technology

2.2.1 Visual Studio Code

Visual Studio Code, also commonly referred to as VS Code is a source-code editor made by Microsoft with the Electron Framework, for Windows, Linux and macOS. Features include support for debugging, syntax highlighting, intelligent code completion, snippets, code refactoring, and embedded Git. Users can change the theme, keyboard shortcuts, preferences, and install extensions that add additional functionality.

Figure 2.2.1 Visual studio code

2.2.2 Xampp

is a free and open-source cross-platform web server solution stack package developed by Apache Friends, consisting mainly of the Apache HTTP Server, MariaDB database, and interpreters for scripts written in the PHP and Perl programming languages. Since most actual web server deployments use the same components as XAMPP, it makes transitioning from a local test server to a live server possible.

Figure 2.2.2 Xampp

CHAPTER 3 ANALYSIS AND DESIGN

3.1 Use case diagram

After gathering user requirements, the new system could be represented by a use case diagram is a graphical depiction of a user's possible interactions with a system. A use case diagram shows various use cases and different types of users the system has and will often be accompanied by other types of diagrams as well. The use cases are represented by either circles or ellipses. The actors are often shown as stick figures.

Figure3.1.1 Admin system

Figure 3.1.2 customer system

3.2 ER-diagram

An Entity Relationship (ER) Diagram is a type of flowchart that illustrates how “entities” such as people, objects or concepts relate to each other within a system. ER Diagrams are most often used to design or debug relational databases in the fields of software engineering, business information systems, education, and research. Also known as ERDs or ER Models, they use a defined set of symbols such as rectangles, diamonds, ovals and connecting lines to depict the interconnectedness of entities, relationships, and their attributes. They mirror grammatical structure, with entities as nouns and relationships as verbs.

Figure3.2.1 ER-diagram

Figure3.2.2 equipment table

Table shows equipment data collection.

field	Attribute name	Data type	Description	key
1	equid	Int(11)	Equipment id	PK
2	picture	Int(11)	Equipment image	
3	name	Varchar(60)	Equipment name	
4	price	Int(11)	Equipment price

Field	Attribute name	Data type	Description	Key
1	User ID	Int(10)	User ID	PK
2	name	Varchar(60)	Username	
3	password	Varchar(60)	Password	
4	address	Varchar(60)	User's address	
5	email	Varchar(60)	User's email	
6	number	Varchar(10)	User's number	
7	role	Int(2)	Admin, user	

CHAPTER 4

CONCLUSION

Throughout the project period, from the design, planning and development of this system, starting with the design of functionality, design of UXUI, and study of reliable sources from multiple sources. In terms of system development, it is an important work step for a successful project. Therefore, must be designed Plan and assigned tasks that each member is responsible for as well. Whether in the design of the system database design and including programming, inventing various functionalities to be easy to use and suitable for users, we have created a system for buying LPG products. to test the functionality of the system before starting to use it in real life. During the process, there were problems and system errors. But we have made corrections throughout the working period. This allows web applications to be developed to the extent that they can be used in some real functionalities. And we will continue to develop the system to be the most complete and useful to the School of Information Technology as much as possible before starting to use it.

Food Service

At Gootas, we understand that life can sometimes be a whirlwind, and there are moments when you need your essentials in a hurry. That's why we're thrilled to introduce our Express Food Delivery service to make your life a little easier. When you're in a rush and craving something delicious, our Express Food Delivery is your solution. We've streamlined our delivery process to ensure that your favorite food items arrive at your doorstep swiftly and conveniently. Whether it's a hearty breakfast, a quick lunch, or a savory dinner, our menu offers a delectable selection of food items that are not only tasty but also carefully prepared to maintain their quality and flavor.
